

UDS Enterprise 1.9 beta available

UDS Enterprise 1.9 beta is already available on our [website](#) and on our [demo platform](#). This new version of our multiplatform connection broker for Windows and Linux features important innovations for IT administrators and users, such as:

Application virtualization. From this version onwards, it brings together two complementary technologies: desktop virtualization and application virtualization ([video](#)).

NUTANIX ACROPOLIS support. It features the deployment of virtual desktops on Nutanix Acropolis hypervisor in a fully operational way.

JAVA not required. It enables the access to virtual desktops and apps from any browser without using Java, making easier both system access and administration.

Reports and statistics. The system automatically generates reports which show detailed info, statistics and recaps about users, service pools, access and any UDS Enterprise component.

SPICE Protocol support. The number of protocols used in UDS Enterprise is increased.

For further information about UDS Enterprise 1.9, to request access to [UDS Enterprise Online Demo](#), [UDS Enterprise Free Edition](#) or [UDS Enterprise Evaluation Edition](#), email us at info@udsenderprise.com

About UDS Enterprise

UDS Enterprise is a **multiplatform connection broker for Windows and Linux** that provides virtual desktop lifecycle management and allows to unify the access to any IP system registered in the system.
