Virtual Cable gives away its remote access technology to any Ukrainian organization

Madrid March 11, 2022.- The invasion of Ukraine has shocked the world. It was unthinkable that this would happen in the XXI century. Thousands of organizations, countries, and companies have turned to support the people affected by this conflict.

Virtual Cable, the UDS Enterprise VDI software developer, wants to show its full support for Ukraine. To this end, they have decided to offer their remote access solution to any organization whose facilities are located in that country for up to two years after the end of the conflict.

With this action, Virtual Cable responds to this humanitarian crisis, helping Ukrainian companies continue their activity, enabling a secure remote working system for all employees who require it.

Virtual Cable also offers its desktop and application virtualization solution to any educational entity that needs it, thus helping students continue training from any location. With UDS Enterprise, they can carry on their classes using any device.

In addition to contributing to business and educational activity development, Virtual Cable considers it essential to collaborate in the country's reconstruction once the war is over. That is why this aid to the Ukrainian population will continue for two years after the resolution of the conflict.

Virtual Cable's philosophy has always gone hand in hand with the Ten Principles of the United Nations Global Compact and the UN Sustainable Development Goals. "We intend to help as much as possible to achieve objectives that guarantee the protection of fundamental human rights, access to inclusive, equitable, and quality education, and promote sustainable economic growth, employment, and decent work for all," explains Félix Casado, CEO of Virtual Cable.

All Ukrainian organizations that require the help of Virtual Cable to implement a remote working or eLearning system can contact the company at helpucrania@virtualcable.net

About Virtual Cable

Virtual Cable develops, supports and markets UDS Enterprise through a subscription model based on the number of users, which includes product support and upgrades. The Virtual Cable team has over 30 years expertise in IT and software development and more than 15 years expertise in virtualization technologies. Millions Windows and Linux virtual desktops are deployed everyday worldwide with UDS Enterprise.
