

# UDS Enterprise

## Basic Information

www.udsenderprise.com

### What is UDS Enterprise?

UDS Enterprise is a multiplatform connection broker for:

- VDI: Windows and Linux virtual desktops administration and deployment
- App virtualization
- Desktop services consolidation

In short, UDS Enterprise manages user access to IT resources in Data Center or Cloud.

### What is UDS Enterprise for?

Virtual desktops, applications and other Windows & Linux services administration and deployment.

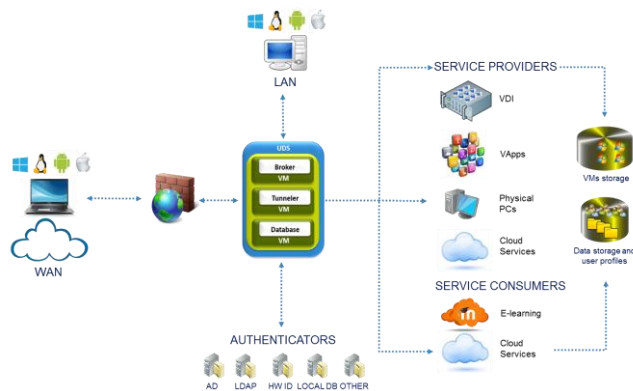

Access management from LAN & WAN to resources platforms hosted on Data Center or Cloud environments.

Manage user accesses to assigned resources.

Automatic management of the resources lifecycle (desktops, applications...).

Organize and optimize VDI platforms, managing access, timeout and features over deployed resources, handling multiple connection protocols, services, authentication systems, alarms, templates, statistics, rules and reports.

Unification of any IP service registered in the system.

### How is UDS Enterprise commercialized?

VirtualCable is the company that develops, supports and commercializes UDS Enterprise both cloud & on-premise versions.

UDS Enterprise is commercialized through a subscription model, which includes software updates, patches and NBD 8x5 email support.

UDS Enterprise may be purchased to the company VirtualCable, through its Partners.

In addition, VirtualCable offers professional services in its portfolio to help its partners and clients in the process of installation and configuration of UDS Enterprise.

### What is the Partner Program?

The UDS Enterprise Partner Program authorizes companies and developers to commercialize software subscriptions and associated services, expanding its portfolio and complementing its range of licensed software and third-party hardware.

UDS Enterprise Partner Network includes IT companies which provide services at a national and international level.

### Ok, I'm interested, what comes next?
