

UDS Enterprise is verified as Citrix® Ready for Citrix Hypervisor 8.2 LTSR

[UDS Enterprise](#), the popular software for desktop virtualization, application virtualization and remote access is trusted to enhance Citrix Workspace™ experience.

MADRID, SPAIN – 28/06/2021

[Virtual Cable](#) today announced that its **UDS Enterprise** connection broker for VDI, vApp and remote access to both physical and virtual devices has been verified as **Citrix Ready™ for Citrix Hypervisor 8.2 LTSR**.

The [Citrix Ready program](#) helps customers identify third-party solutions that are recommended to enhance Citrix [digital workspace](#), and [app delivery and security](#) solutions. UDS Enterprise completed a rigorous verification process to ensure compatibility with Citrix Hypervisor, providing **confidence in joint solution compatibility**.

The Citrix Ready program makes it easy for customers to identify complementary products and solutions that can enhance Citrix environments. Customers can be confident that **UDS Enterprise has successfully passed a series of tests** established by Citrix and can be **trusted to work effectively with Citrix Hypervisor 8.2 LTSR to deploy and manage virtual desktops and applications** in a secure, fast and efficient way.

The UDS Enterprise connection broker brings **simplicity, high levels of automation, scalability and centralized management** to virtual desktops and applications deployments with Citrix Hypervisor. In addition, the latest version [UDS Enterprise 3.0](#) includes new functionalities to enhance [remote working](#) and eLearning environments, with new administration capabilities, **improved remote access to virtual and physical devices** and compatibility with **Wake on LAN** technologies.

UDS Enterprise adds flexibility to VDI and vApp infrastructures with Citrix Hypervisor. This software provides the **freedom to choose the virtualization, hyper-convergence platforms, connection protocols and authentication systems** that best suit each project. IT administrators can even combine as many elements as needed to run simultaneously, building a fully customized VDI platform, adapted and optimized to the specific requirements of each group of users.

“As a member of the Citrix Ready program, **we are able to offer customers intelligent solutions that combine our UDS Enterprise software with Citrix Hypervisor product**,” said Félix Casado, CEO at Virtual Cable. “The offering clearly demonstrates our plans to work closely with trusted partners, through the Citrix Ready partner ecosystem, in order to provide the highest quality experience for our customers.”

“**UDS Enterprise has proven to be a reliable, versatile and secure solution that works seamlessly with Citrix Hypervisor**,” said John Panagulias, Director, Technology Ecosystem Partner Program, Citrix. “Through the combination of our technologies, customers can create **solid and easy to manage VDI deployments supported by trustworthy professionals** that enable them to deliver a unified, secure and reliable work experience so that employees can get work done, wherever it needs to get done.”

About Virtual Cable

[Virtual Cable](#) develops, supports and commercializes UDS Enterprise through a subscription model based on the number of users, including support and product updates. In addition, Virtual Cable offers professional services to install and configure UDS Enterprise.
