

VirtualCable & OpenNebula Systems team up to deliver a next generation VDI solution

Madrid, Spain, <20th September 2016> — **VirtualCable** is a pioneering Spanish company that develops and supports **UDS Enterprise**, a multiplatform connection broker to deploy and manage **virtual** and physical **desktops**, applications and other Windows & Linux remote desktop services. It is not only compatible with nearly all hypervisors, authenticators and connection protocols in the market, but also allows to simultaneously enable them as needed.

OpenNebula Systems is the company behind the OpenNebula open source project. OpenNebula is a leading **Cloud management system** – simple, yet powerful. It is easy to deploy, manage and grow. OpenNebula interoperability makes cloud an evolution by leveraging existing IT assets, protecting previous investments, and avoiding vendor lock-in.

Both companies have signed a **Technology Partnership agreement** to join the power of their software and offer their customers a next generation **VDI** solution. OpenNebula Systems has granted **OpenNebula Ready** certification to UDS Enterprise, which ensures compatibility and seamless integration of both solutions.

With OpenNebula as cloud manager and UDS Enterprise as VDI connection broker, any company deploying **desktop virtualization** can build a strong, secure, efficient and **high-performance** infrastructure.

UDS Enterprise and OpenNebula are **Open Source** solutions, minimizing initial investment and enabling customization and the integration of new functionalities in the virtual desktops infrastructure. In addition, UDS Enterprise team offers **personalized support** through a subscription system based on user segments featuring product updates.

“UDS Enterprise and OpenNebula integration allows to automatically deploy and **manage virtual desktops’ full lifecycle**, ensuring an efficient use of resources, providing extra **security** and enabling access from any device and any operating system”, said Félix Casado, CEO of VirtualCable.

“OpenNebula and UDS Enterprise integration brings a **fully managed, secure computing service** for virtual desktops delivery that enables users to stay connected and productive anywhere”, commented Ignacio M. Llorente, CEO of OpenNebula Systems.

About VirtualCable

VirtualCable is a Spanish company specialized in virtualization and dedicated to software development and professional services. VirtualCable develops and supports **UDS Enterprise**, a multiplatform connection broker to deploy and manage virtual and physical desktops, applications and other Windows & Linux remote desktop services. UDS Enterprise allows to simultaneously enable multiple hypervisors, authenticators and connection protocols, guaranteeing resources optimization and obtaining substantial cost savings.
