

UDS Enterprise Attains VMware Partner Ready for vSphere Validation

<Madrid, Spain, Oct 11, 2019> — VirtualCable, the company that develops and supports UDS Enterprise VDI & vApp connection broker, today announced that its **UDS Enterprise has attained VMware Partner Ready for vSphere validation.**

By validating **UDS Enterprise 2.2.1 with VMware vSphere 6.7**, and attaining the VMware Partner Ready logo, VirtualCable has **tested and verified its interoperability with VMware vSphere and can fully manage customer support requests** for UDS Enterprise with VMware vSphere.

“We are pleased that VirtualCable’s UDS Enterprise is validated for VMware vSphere. VMware Partner Ready for vSphere signifies to customers that **UDS Enterprise can be deployed with the knowledge and reassurance that the partner fully supports the specified versions and configurations on VMware vSphere**,” said Kristen Edwards, director of technology alliance partner programs, VMware.

VMware vSphere is the industry-leading server virtualization software, helping organizations run, manage, connect, and secure applications in a common operating environment across clouds.

By using UDS Enterprise with VMware vSphere, businesses can deploy a **VDI and vApp solution with the highest level of security**. They can easily **manage the full life cycle of their Windows and Linux virtual desktops and applications**, allowing users to access their resources at **any time, from any place and any device**.

“VirtualCable and VMware have teamed up to deliver a **best-in-class VDI and vApp solution, driving reliability and top performance** to their customers,” said Félix Casado, VirtualCable CEO. “Building a VDI & vApp infrastructure with UDS Enterprise and vSphere, IT admins are free to enable multiple hypervisors, authenticators and connection protocols to run simultaneously. Thanks to its Open Source core, **the platform can be fully customized both at image and technical level**, completely meeting the needs of each customer”.

VMware [Partner Ready programs](#) allow partners to test and validate their solutions that interoperate with specific VMware platforms. By completing the Partner Ready process and achieving the Partner Ready logo, partners validate their products interoperability with VMware technologies, and agree to solely manage customer support requests for the combined solution.

VirtualCable’s **UDS Enterprise can be found within the online VMware Solution Exchange (VSX) at <https://marketplace.vmware.com/vsx/solutions/uds-enterprise>**. The [VMware Solution Exchange](#) is an online marketplace where VMware partners can publish rich marketing content and downloadable software for our customers.
