

UDS Enterprise achieves Nutanix Ready certification

- ***Nutanix certifies that UDS Enterprise has successfully undergone verification testing providing confidence in joint solution compatibility, both with Nutanix hardware and Nutanix Acropolis Hypervisor***

Madrid, November 24th 2015.-. [Nutanix](#), the next-generation enterprise computing company, has today announced that **UDS Enterprise**, the multiplatform connection broker for Windows & Linux desktop services, developed by [VirtualCable](#), is now **Nutanix Ready**.

Nutanix Ready identifies recommended applications and solutions that are trusted to enhance the Nutanix delivery infrastructure. UDS Enterprise has completed verification testing, thereby providing confidence in compatibility both with Nutanix hardware and Nutanix Acropolis Hypervisor. VirtualCable is the first partner in Spain and one of the firsts in the world to integrate with Nutanix. The integration of both solutions brings uncompromising flexibility and down costs for desktop and application virtualization.

Acropolis is a native hypervisor based on the proven Linux KVM hypervisor. With enhanced security, self-healing capabilities based on SaltStack and enterprise-grade VM management, Acropolis Hypervisor delivers the best overall user experience at the lowest TCO and will be the first hypervisor to plug into the App Mobility Fabric.

*"UDS Enterprise and Nutanix Acropolis integration provides customers with unprecedented flexibility, scalability and cost optimization for desktop services", explains **Rafael García, Sales Director at VirtualCable**. "Apart from multiple hypervisors, authenticators and connection protocols support, a joint platform with UDS Enterprise and Nutanix enables to increase one node at a time without needing to add extra hypervisor or broker licences".*

Flexibility and cost savings in VDI deployments

UDS Enterprise components are provided in **Virtual Appliance** format and they are hosted on Acropolis platform. Virtual desktops deployment with UDS Enterprise and Nutanix Acropolis is performed in one click, allowing the deployment of 40 virtual desktops on Nutanix Acropolis in less than two minutes ([video](#)).

UDS Enterprise is marketed through a subscription system based on the number of users, ensuring cost-cutting: the broker cost is fixed for each user segment. Thus, in a project with Nutanix Acropolis there's only a need to increase the number of nodes; without needing to add extra hypervisor or broker licences

*"UDS Enterprise certification allows us to create a product ecosystem for our Hypervisor Acropolis and reach those sectors where our presence is not yet relevant" says **Arnaud Demene, Presales Director at Nutanix Iberia** "Nutanix brings simplicity to virtual environments and UDS Enterprise brings simplicity to VDI world, so our joint solutions drive advantages to our customers".*

The designation of UDS Enterprise as Nutanix Ready is a further step in Nutanix and VirtualCable alliance. Both companies have been working together as Technology Partners for a long time, guaranteeing best support and innovative hiperconverged, virtualization and desktop services solutions for their customers.

About VirtualCable

VirtualCable is a software development & professional services company specialized in virtualization. The company markets UDS Enterprise through a subscription model, featuring support and updates, depending on the number of users.

About UDS Enterprise

UDS Enterprise is a multiplatform connection broker to administer and develop virtual and physical desktops, applications and other Windows & Linux services.
