

## **Windows 11 desktop virtualization is now possible with UDS Enterprise**

*Windows 11 users can now benefit from all the flexibility and other advantages of the UDS Enterprise connection broker*

**Madrid, November 4, 2021** - Thanks to the Virtual Cable development team, the stable version of the UDS Enterprise 3.0 connection broker supports Windows 11; Microsoft's latest update released on October 5.

Platform administrators can now deliver virtual desktops with the new version of Microsoft's operating system to their users. In this way, they can benefit from all the advantages of centrally and automatically deploying and managing virtual desktops with the latest Windows 11 enhancements.

Likewise, users can now access UDS Enterprise with devices with Windows 11 operating system. Thus, they have at their disposal all the necessary tools for day-to-day work available through virtual desktops, virtual applications –both Windows and Linux– and remotely accessible computers- Windows, Linux, and, starting with the next software update, macOS-.

This VDI solution with Windows 11 brings all the advantages of UDS Enterprise: flexible access, centralized management and standardization of all workstations, high levels of automation of the life cycle of the desktops, quick and easy scalability, increased security and cost savings, among others.

Once again, after ten years of experience developing VDI software, Virtual Cable, the company behind UDS Enterprise, confirms its commitment to ensuring that its service is available to all users by adapting to the latest operating system developments.

"Our goal is to offer updated solutions to new versions of software to facilitate the use of the latest technology for our customers," says Javier González, Technical Director of Virtual Cable. "We hope to achieve as many case studies as we obtained with the compatibility of our VDI broker with Windows 10."

Along these lines, the success of UDS Enterprise technology to implement remote work during the pandemic year is noteworthy. Thus, during the state of alarm for Covid-19, remote working using Windows 10 virtual desktops was made possible for many professionals at Los Arcos del Mar Menor University General Hospital (Murcia). As a result, they were able to carry out their tasks from home. Furthermore, Grupo Félix Santiago Melián (FSM) and the Benalmádena City Council (Málaga) also trusted Virtual Cable to guarantee their employees teleworking in optimal and efficient conditions using VDI with Windows 10.

**About Virtual Cable**

Virtual Cable develops, supports and markets UDS Enterprise through a subscription model based on the number of users, which includes product support and upgrades. The Virtual Cable team has over 30 years expertise in IT and software development and more than 15 years expertise in virtualization technologies. Millions Windows and Linux virtual desktops are deployed everyday worldwide with UDS Enterprise.
