

## VirtualCable UDS Enterprise achieves VMware Ready™ status

**Madrid, Spain, <November 10<sup>th</sup>, 2015>** — VirtualCable, the company that packs up UDS Enterprise, a VDI multiplatform connection broker for Windows and Linux, today announced that its UDS Enterprise has achieved VMware Ready™ status. This designation indicates that UDS Enterprise has undergone detailed test procedures and is supported on VMware vSphere® 5.X for production environments.

“VirtualCable and VMware have teamed up to ensure the best performance of both solutions, driving reliability and full support to their customers”, said Rafael García, VirtualCable Sales Director. “By using UDS Enterprise with vSphere 5.X enterprises can deploy Windows & Linux remote desktops, applications and services using multiple authentication systems and connection protocols, managing platform resources with high performance and flexibility.”

“We are pleased that VirtualCable’s UDS Enterprise qualifies for the VMware Ready™ logo, signifying to customers that it works effectively with VMware vSphere®, and can be deployed in production with confidence,” said Howard Hall, senior director, Global Alliances & OEMs, VMware.

The VMware Ready program is a co-branding benefit of the [Technology Alliance Partner \(TAP\) program](#) that makes it easy for customers to identify partner products certified to work with VMware cloud infrastructure. Customers can use these products and solutions to lower project risks and realize cost savings over custom built solutions. With thousands of members worldwide, the VMware TAP program includes best-of-breed technology partners with the shared commitment to bring the best expertise and business solution for each unique customer need.

VirtualCable’s UDS Enterprise can be found within the online VMware Solution Exchange (VSX) at <https://solutionexchange.vmware.com/store/products/uds-enterprise#.VfL2QxFVhBc>.

## About VirtualCable

VirtualCable sells UDS Enterprise through a subscription model, including product support and updates in segments based on number of users. Additionally, VirtualCable offers a broad portfolio of professional services to install and configure UDS Enterprise and other virtualization technologies.
